Experience

Software Engineer - Associate 2 July 2025 – Present
State Street Corporation *Hyderabad, India*

- Modernized the frontend stack across **3 production applications** by migrating Create React App to **Vite** and upgrading **React 17 to 19** and **MUI 5 to 7**, resolving compatibility issues.
- Upgraded **AG Grid 21 to 36** and built a custom date-picker to enforce consistent date formatting across regions after browser-locale issues surfaced in production.
- Implemented reusable **RBAC and Target-Based Access Control (TarBAC)** hooks, consuming database-driven permissions from Spring Boot APIs to control component visibility and accessibility without frontend code changes.
- Implemented frontend encryption/decryption for sensitive data using **AES and asymmetric key mechanisms**; developed Spring Boot endpoints and Oracle SQL for application workflows and verification.
- Resolved production regressions across UI, AG Grid filtering and authorization; supported UAT and production releases through deployment coordination and post-deployment validation.

Software Engineer Intern Jan. 2025 – July 2025
State Street Corporation *Bengaluru, India*

- Developed and enhanced production UI functionality using **React.js** and **Redux Toolkit**; contributed to defect resolution, reviews and release activities using Jira, Bitbucket and Jenkins.

Software Development Engineer Intern June 2024 – July 2024
D360 Tech *Surat, India*

- Developed **Python/Flask** serverless functions on **Google Cloud Functions** to serve backend functionality to the application UI.
- Reduced measured end-to-end response time by **40.79%** by partitioning large files into pattern-based segments to reduce network retrieval, combined with hash-based lookups for faster data access.

Projects

InstaCV | ***React, TypeScript, Redux Toolkit, Tailwind CSS*** GitHub | Live

- Built and deployed a resume-generation app with real-time preview, persistent state and reusable **React/TypeScript** components.
- Implemented interactive split-pane editing and centralized state management with **Redux Toolkit**.

Airbnb Clone | ***React, Node.js, Express.js, MongoDB, Tailwind CSS*** GitHub

- Built a full-stack property-booking platform with authentication, listings/search, booking management, reviews and user profiles.
- Implemented REST APIs and MongoDB-backed workflows across the React frontend and Node/Express backend.

Technical Skills

Languages: Java, C++, JavaScript, TypeScript, Python, SQL
Frontend: React.js, Redux Toolkit, MUI, AG Grid, Vite, Tailwind CSS, HTML/CSS
Backend / Data: Spring Boot, REST APIs, Oracle, MySQL, MongoDB
Tools / Cloud: Git, GitHub, Jenkins, Bitbucket, Jira, Google Cloud Platform, Firebase

Achievements

- **Codeforces Specialist** (peak 1536) and **LeetCode Knight** (peak 2052, top 2%).
- **Google Kick Start 2022 Round H**: Global Rank 1804; solved **2000+** programming problems across Codeforces, LeetCode, CSES and GFG.

Leadership

Technical Head Sep. 2023 – Nov. 2024
Computer Society of India, Nirma University *Ahmedabad, India*

- Organized the **36-hour HackNUthon 5.0** with **700+ participants** and designed/tested DSA and competitive-programming problems for Codeforces and Unstop.

Education

Institute of Technology, Nirma University Sep. 2021 – May 2025
*Bachelor of Technology in Computer Science and Engineering (CGPA: **8.31**)* *Ahmedabad, India*
